

Art Unit: 3743

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A heat exchanger ~~comprised of two or more~~ comprising:

at least first and second heat exchangers which are disposed ~~on the windward and leeward side of a ventilating direction~~ in parallel at right angles to ~~the ventilating a~~ direction of ventilating airflow, wherein:

the first and second heat exchangers, which are a condenser and a radiator, respectively, ~~are configured by stacking~~ have a plurality of first and second stacked tubes, respectively; and

~~the heights of the first tubes of [one] the first heat exchanger disposed on the windward of the ventilating direction are lower~~ have a height smaller than the height[s] of the second tubes of the [other] second heat exchanger ~~disposed on the leeward side.~~

2. (currently amended) The heat exchanger according to claim 1, wherein the ~~respective tubes of the~~ two or more heat exchangers disposed in parallel have substantially the same space between the stacked tubes.

3. (original) The heat exchanger according to claim 1 or 2, wherein the respective tubes have a height of less than 1.6 mm.

4. (previously presented) The heat exchanger according to claim 1 or 2, wherein the two or more heat exchangers

Art Unit: 3743

disposed in parallel have a space of 15 mm or less between them.

5. (canceled)

6. (previously presented) The heat exchanger according to claim 1 or 2, wherein the two or more heat exchangers are integrally configured using a common member.
